Geography Home Learning Project

For your creative home learning project this half term, we would like you to make a 3D model of a volcano.

You can use papier-mâché, card, tissue paper, plasticine or anything else you can find at home.

If you would like to challenge yourself, you can make a volcano as a cross section showing the different parts.

If you have a sweet tooth, you could even make a volcano cake! You could take a picture of this to show us.

We cannot wait to see what you come up with!
