

Writing

We are learning how to use our phonics to write lists, labels and captions. It would be really helpful if you could practise this at home. You could:

Write a shopping list

Draw a picture and label it

Write a caption or a simple sentence about an activity you have done.

Phonics

This week we have been recapping our phase 3 digraphs sounds:

Can you think of different words with these sounds in them? Why not have a go at writing them and writing sentences with the words in them?

Tricky Words

The tricky words we have been refocusing on this week are:

was

they

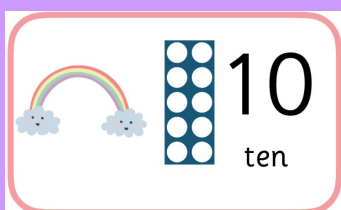

my

you

Can you practise reading and spelling these words? Maybe you could have a go at painting them? Writing them in rainbow colours? Writing them in some sentences?

Maths

We have been learning to recognise numbers from 0-10 in numerals and words. Can you find objects, count them, then write them in numbers and words?

Science— Seasonal Change

In Science we are learning all about what happens when Summer turns to Autumn. This term why not collect natural objects which show this change? You could also observe a tree each week to see how it changes. Can you share what you find out by making a poster or a little book?
