

English

This week in English we have been continuing our learning on how to label different things and ensure it is not going backwards. We have been captioning different pictures, focusing on full stops, finger spaces and capital letter. We have carried on trying to use adjectives in our learning to help extend their vocabulary. We are focusing on letter formation, ensuring they are starting at the right spot and keeping it a consistent size.

Over the weekend, why don't you try drawing a picture and labelling it? You could then write a caption to describe it!

Phonics

This week we have finished our Phase 3 sounds and so from next week we will start again with going over our Phase 4 consonant cluster sounds.

It is really important that the children are becoming aware of consonant clusters when writing as this will follow on nicely when we start our Phase 5 alternative sounds.

Geography— Where I Live

This week in class the children had the opportunity to explore google earth to look at the local area. We looked at the school, the train station and their houses. They really enjoyed exploring this and working as a group to help each other navigate it.

Can you draw a map to show your route to school?

Maths

This week in Maths, we have looked at grouping. It was slightly different to our Reception learning on this topic, as this time it focused on 'if there is enough items in a group for everyone'.

They explored this through different games and activities in the provision.

Over the weekend, could you see if you could share items out between your toys? How many could you put in each group?
