

English

This week in English we have been blown away with the children's poems they have been writing. As you know all of last week we were building on the skill set to write our poems and this week it all came together. The children were able to remember the structure of the poem and think of some brilliant adjectives to describe their autumnal object. Here is an example of the structure of the poems we wrote:

Leaves

I like the leaves

The crunchy, brown, yellow kind

The crunchy under my feet kind

I do like the leaves.

Maybe the children can have a go at writing a different poem about something they like?

Phonics

The consonant clusters we have focused on in Phonics this week are:

What other words can you think of that have these consonant clusters in them?

Can you write a sentence with those words in it?

Science

This week in Science we have continued learning about the weather changes for Autumn. We wrote sentences to show facts about Autumn that we have learnt. We started speaking about how we would dress differently in Autumn compared to summer.

Maths

In Maths we have been learning about the difference between number lines and number tracks. We have focused on starting at different numbers and also going backwards. They have done really well with this!

Why don't you have a go at creating your own number line or number track?

How many different ones can you make?
